

VX2

Expert in industrial laminator

VX2 is a unique vertical laminator custom-designed for the application of a temporary protective film on Insulated Glass Units and flat glass.

The VX2 uses the latest WALCO® patented technologies such as the both face application on the vertical process and the WALCO® cutting system.

Added value

Automatic adjustment of the size of the film in function of the IGU

Protection of both sides of IGU in a single pass

Only 30s to cover both sides of IGU (cycle time)

Safe and ergonomic machine

Cutting system

Automatic with adjustable margin:

- Cut to the edge
- Negative cut

Thickness

Up to 80 mm

Width

Up to 3,200 mm
